

# Consult here... on internationalizing and course design

## Talk to us about:

- where to begin with internationalizing a course or program
- what it means to internationalize the *academic self* (Sanderson, 2008)
- what global knowledge, skills, and attitudes might be appropriate for students in your discipline
- how to assess global and international learning outcomes
- what kinds of teaching and learning activities promote global/intercultural learning

Model adapted from Dee Fink's  
*Creating Significant Learning Experiences* (2003)
